

This is a very complicated and confusing design. You will find it helpful to first study the pattern carefully and color in the parts of the letter to distinguish them from the rest of the design.

Follow the General Directions on pages 6–7 for appliquéing narrow stems and stems with

flourishes. The bobbles at the ends are most easily worked by making yo-yo circles.

When all of the stem work is done, place the letter pieces in alphabetical order. You can either leave a space in piece C to allow the part D piece to slip underneath or lift a few stitches and then repair.
